Best cricket game for android with high graphics. Which is the best cricket game for mobile. Best graphics cricket games.

Playing games on your Android phone is fun, but things can get a little cramped on those small screens. That's when it's time to whip out your handy-dandy tablet and get a more immersive experience going. Here are some of our favorite games to play on a nice, big slate that provides plenty of room to tap and swipe. Featuring one of the more seemingly useless creatures of the franchise, *Pokemon: Magikarp Jump* is a cute *Pokemon Go* spin-off that is anything but derivative. This game revolves around feeding and training your Magikarp to jump as well as keeping it safe from predatory Pidgeotots. Controlling your fishy friend involves tapping the screen to perform various actions. The graphics are bright and adorable, which fits with the game's more passive nature. Complete with tons of gaming in-jokes, *Pokemon: Magikarp Jump* is a delightful treasure. An interesting take on endless-runner games, *Flipping Legend* is a fun, fast-paced game with retro-style graphics. You control your character's forward movement by tapping the left or right buttons; the twist is that you can move forward only diagonally, not vertically. This neat shift forces you to think differently when avoiding obstacles and taking down enemies. You can also flip backward in a straight line, but be careful, as that drains your special meter. You'll race against your steadily declining health meter to reach the end of each course. The game's music is fantastic and complements the 16-bit feel of the visuals. Making the leap to mobile platforms, *Jaipur* is a neat card game that revolves around trading resources. Set in ancient India, the game has you collect, trade and sell different goods in an effort to get the most points. The rules are simple to grasp, and once you have a feel of the gameplay, rounds go by very smoothly. The graphics are lovely, and the background music and sound effects evoke the feeling of a bustling marketplace. Plus, each match is relatively fast; you can play an entire set against an opponent in less than 30 minutes. The mobile version of the long-anticipated sequel *Injustice 2* is finally out! Choose from among your favorite DC heroes and villains and duke it out on several beautifully rendered stages. The brawling mechanics are simple to grasp, and attacks can be done via tapping or swiping your screen. When your character's meter is full, you can unleash a devastating super move. The characters move very smoothly and the cutscenes are stunning and full of minor graphic details. *Injustice 2* also offers various single-player and multiplayer gameplay modes, and lets you customize your characters to better their strengths and defenses. Whether you're a hard-core comics nerd or merely a fighting game enthusiast, *Injustice 2* is a must-get. Produced by a national museum, *Father and Son* is quiet and fun point-and-click adventure game. You play as Michael, who is researching his archaeological father's past. During the game, you'll travel to different points in time and make choices that will affect the ending. The touch screen is used to move, interact with objects and decide actions. The story line is intriguing, and the graphics are rich and reminiscent of museum-quality fine art. If you're looking for a unique and interactive adventure, add the game to your library. Everyone's favorite mustachioed plumber is back for adventure in this addictive side-scrolling, endless runner. In this game, Mario runs from left to right automatically and you jump, double jump, or jump and spin kick by tapping the screen. The game can be straightforward and simple, with you barreling through each level, or you can challenge yourself by collecting five pink coins in each level. However, there is a small catch. While the free version offers you a limited number of levels, you must pay \$9.99 to can access all the worlds. The sequel to *Drop Wizard*, *Drop Wizard Tower* is a fun, free 2D game with a great early '90s-retro vibe. Your character is a wizard who's trying to advance up a tower by killing various enemies by first stunning them with a star and then running into them after they're dazed. The graphics and the music evoke a feeling of old-school platformers such as *Alex Kidd*, and the gameplay offers just enough of a challenge to keep you on your toes. Name a fun game-show adaptation that's sure to keep you occupied. If you guessed *Family Feud Live*, you're a winner. Although the game is bereft of Steve Harvey and his ad-libbed quips, *Family Feud Live* offers three addictive gaming modes and lets you play against your friends or strangers. The game offers classic, tournament and fast-money modes. Classic mode plays just like the show, with three rounds and escalating point totals. Tournament mode is similar but requires you to defeat three opponents. Fast money is similar to the final round, in which you have to guess the top answers to five questions. Set in a lethal circus, *Penarium* is a bizarre and fun 2D-arena platformer in which your only goal is to survive an onslaught of hazards for a mad audience. The game casts you as hapless innocent Willy who is tasked with collecting barrels and coins. Although the game starts off with easy hazards, after every five barrels, the dangers get harder and harder. Before you know it, you'll be dodging ice spikes, bees and heat-seeking missiles. You use your touch screen to control Willy's movements and guide him to safety. The challenge is as much a part of the charm as are the cool throwback graphics and the silly, circus-like music. *Arkanoid vs. Space Invaders* is a fun crossover puzzle game developed by Square Enix. Much of the gameplay is based around *Arkanoid*, the classic game in which you use a paddle to deflect aliens' shots back to destroy either their spaceships or bricks. In typical Square Enix fashion, the game has an in-depth story and a good justification as to why aliens are bobbing and weaving through bricks trying to colonize peaceful planets, but you can skip this story if you're not into it. The biggest selling point is that there are no unnecessary in-app purchases, which is a refreshing change of pace when buying a fully realized mobile game. Perfect for the retro gamer on the go, *Sega Forever* is an amazing app that allows you to play several games originally released on Sega consoles, from mega-hits such as *Sonic the Hedgehog* to the critically acclaimed but obscure *Comix Zone*. The emulation on these games is pitch-perfect, the touch-screen controls work like a charm, and with the addition of cloud saves, you won't have to worry about losing your progress. Although the library is small, more games will be added in the near future, turning this app into a Netflix for retro Sega games. Although *Run or Die* gives away most of its premise in its title, this side-scrolling, endless runner has a few extra tricks up its sleeve. The game contains 170 detailed levels with day-and-night-cycle variations. In addition to running, you'll also have to jump, slide and use various abilities in order to stay alive. The touch-screen controls are very responsive, which is perfect since you'll have to make split-second decisions to avoid dying. Along with a standard level, *Run or Die* also contains a very helpful training mode, an endless mode and a challenge mode, in which you can compare your times to players around the world. This underground, indie fighting-game hit has finally made the leap from consoles to the small screen. Created as a love letter to fans of the *Capcom Versus* series, *Skullgirls* is a fun fighter with the distinction of having a majority-female roster. Instead of a six-button and joystick structure (which is not possible to comfortably replicate on a touch screen), *Skullgirls* uses a simplified control scheme in which swipes and taps are used to execute attacks. The game's graphics are beautiful and complement the jazzy and jaunty music to evoke an old-school Hollywood glamor feel. Whether you're a fighting game nerd or just a sucker for cartoonish violence, you'll get a major kick out of *Skullgirls*. The first thing to notice about *Old Man's Journey* is the beautiful art, which gives the game a distinctive look and feel. In this gorgeous mobile game, your goal is to help an old man on a journey by using your touchscreen to manipulate his surroundings. For example, you can enlarge a hill to help the man get to higher ground or tap sheep to move them aside so your character can pass. Instead of relying on words, the game tells a rich story using actions and music for a more immersive experience. If you're a fan of NASCAR and stock car racing, *NASCAR Heat Mobile* is a great addition to your Android tablet. The gameplay involves tapping or tilting your phone in order to steer. The controls don't feel too stiff, and the maneuvering is pretty smooth. You can generate resources by constructing a Fan Zone and use said resources to enhance your car or hire drivers who have their own souped-up vehicles. Although winning every race is important, *NASCAR Heat Mobile* also has extra objectives such as maintaining a high average lap speed. Overall, the gorgeous graphics and inspired tracks will keep you doing one more lap. No new notifications You'll get updated when important things are happening, and when you engage with our community. 3D games are becoming more common on Google's Android OS, and in this slideshow we've gathered some of the best to get you started. Even those titles without snazzy graphics are pretty addictive. Let's take a look. *Speed Forge 3D* sets its racing action in the future, on an inhospitable planet. The illegal races involve heavy-duty hover vehicles; you can choose from among three styles. You can compete on six different tracks, and add weaponry such as mines and homing rockets to your vehicle. One quick tip to increase the game's performance: Turn the music off. If you prefer race cars of our time, consider *Raging Thunder*. *ToonWarz* is a great 3D first-person shooter, with two gameplay modes available over four missions. In addition to offering nice graphics, it supports multitouch on Android 2.0 devices. Once you get used to the on-screen controls, the gameplay becomes fluid. After you complete the missions, you can play against other people in real-time deathmatches. If you like *ToonWarz*, you might also want to check out *ExZeus*. *Robo Defense* is a classic tower-defense game packed into your mobile phone. Addictive and fun, the game features above-average graphics and allows you to get new weapons through sell-backs or upgrades. Depending on your strategy, you can spend your points to upgrade the towers, so you're not stuck with insufficient defenses later in the game. If you want more maps or to save your game progress, though, you'll have to go for the paid version. *Bonsai Blast* is not a complicated game, but it packs in hours of great fun. Colored marbles travel down a path, and you have to stop them from reaching the end by shooting more marbles at them. Once you've linked three or more marbles of the same color, they disappear and you get points. Fans of puzzle games will appreciate the 90 Zen-themed maps in *Bonsai Blast*, as well as the single-tap control method, which saves you the hassle of positioning the cannon before shooting. One of the latest 3D games to grace Android phones, *Mystique Chapter 3 Obitus* is an immersive first-person adventure with great graphics and a haunting soundtrack. The horror action takes place in two distinct environments (a hospital basement and a hellish alternate world), and the game features fully animated characters. You'll find plenty of challenging puzzles, too. But it's best not to play this game for the first time with the lights off. *Buka* is a cheerful orb, but mean asteroids stand in its way. With an arsenal of weapons such as shockwaves and spark attacks at your fingertips, your mission is to get *Buka* home, referred to as "The Happy Place." Overall, this is a great little game with plenty of levels and variety; it will keep you busy constantly. You'll have to strategize carefully: Sometimes you'll encounter too many asteroids to eliminate, so you'll have to avoid some of the obstacles-which, unfortunately, awards you no points. UFOs have abducted your fellow animal friends, and you have to save them. To get to the aliens, though, you must jump on platforms and control your direction by tilting the phone sideways. *Abduction* is a fun game with lots of power-ups, level schemes, and unlockable levels and animals (you start as a cow) along the way. The concept is simple yet entertaining-and if you have kids, you might not get your phone back anytime soon. *Gem Miner* is another simple game from the creator of *Abduction*. This time you have to raise a fortune by digging and exploring a mine. You mainly mine for coal, but you can also unearth bonuses such as gems or maps. It's critical that you have enough ladders to get back out of the mine; but the more money you raise, the better tools you obtain to dig deeper and find more-valuable items. Again, the graphics are uncomplicated but the gameplay is highly entertaining. *Kumpa* is a labyrinth game that makes use of the accelerometer in your Android phone to help you navigate around the maze and light up various symbols in the levels, which in turn gives you points. As you level up, more obstacles, such as the "hole of death," appear in your way while you try to collect items before the time expires. It's a great casual game; fans of pinball-like action will like *Kumpa*. The premise for *Armored Strike* is simple: Eliminate your opponent, in multiplayer mode against the AI or a friend (nonnetworked). Essentially a turn-based strategy game in the style of *Worms* and *Scorched Earth*, *Armored Strike* stands out with its smooth graphics and fun gameplay. The game gives you many weapon choices, and once you get used to the angles and velocities, it becomes pretty entertaining. If you're not sure about spending \$3.99, though, fiddle with the free trial first. Though it looks confusing at first glance, *Cestos* is an interesting game. You have to knock all of your opponents' (up to four) marbles into space by dragging your own marble in the direction you want to shoot. *Cestos* requires a bit of strategy, as all players must enter their moves at the same time-and a match can last up to 5 minutes. The game is very social, too; you can friend/ignore anyone from the growing online community, and chat with or send private messages to fellow gamers. *UniWar* is a well-developed online multiplayer turn-based strategy game that can connect up to eight players at a time in up to 20 games at once. Fans of *StarCraft* will appreciate *UniWar*, especially as the game also allows for a campaign mode against the AI with 21 missions altogether. You'll find over 50 maps, and you can play two-versus-two, three-versus-three, or four-versus-four games online with integrated in-game chat.
